**Inhalation:**

If inhaled, remove to fresh air and keep at rest. Avoid all unnecessary movement. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention if breathing problems develop.

**Skin Contact:**

In case of skin contact, immediately remove contaminated clothing and wash affected areas for 10-20 minutes with warm water and non-abrasive soap. Repeat flushing and seek medical attention if symptoms persist.

**Eye Contact:**

In case of eye contact, rinse cautiously with water for at least 15 minutes while holding eyelid(s) open. Take care not to rinse contaminated water into the unaffected eye or onto the face. Take special care if the exposed person is wearing contact lenses. Continue rinsing. Seek immediate medical attention.

**Ingestion:**

If swallowed, do NOT induce vomiting. Seek immediate medical attention and show this SDS or the product label.

**Symptoms Caused by Exposure:**

Inhalation: May cause respiratory irritation.

Eye Contact: Causes eye irritation. May cause redness and lachrymation.

Ingestion: May cause gastrointestinal irritation, nausea, vomiting and diarrhoea.

## 5 Fire Fighting Measures

**Suitable Extinguishing Media:**

For small fires, use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Fight larger fires with water spray or alcohol-resistant foam.

**Specific Hazards Arising from the Chemical:**

Hazardous combustion products include carbon dioxide, carbon monoxide, smoke, oxides of nitrogen, other nitrogen compounds and hydrogen cyanide gas.

This product is not flammable, but may burn or decompose in a fire.

Containers close to fire should be removed if safe to do so. Use water spray to cool fire exposed containers.

Prevent firefighting run off from entering drains or water courses.

Hazchem Code: \*3Z

**Special Protective Equipment and Precautions for Fire Fighters:**

When fighting a major fire wear self-contained breathing apparatus and protective equipment.

## 6 Accidental Release Measures

### Environmental Precautions:

In the event of a major spill, prevent spillage from entering drains or water courses.

### Methods and Materials for Containment and Cleaning Up:

Stop leak if safe to do so and absorb spill with sand, earth, vermiculite or some other absorbent material. In the event of a major spillage, create a dike to stop spill from spreading. Collect the spilled material and place into suitable containers for disposal. Decontaminate area with detergent and the smallest volume of water practicable and rinse.

## 7 Handling and Storage

### Precautions for Safe Handling:

Use of safe work practices are recommended to avoid eye or skin contact and inhalation of vapours. Use only outdoors or in a well-ventilated area.

Food, beverages and tobacco products should not be stored or consumed where this material is in use. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use. Provide eyewash fountains and safety showers in close proximity to points of potential exposure.

### Conditions for Safe Storage:

Store in a cool, dry and well ventilated area. Keep in original container, tightly closed when not in use. Protect from direct sunlight, heat, sparks, open flames and hot surfaces. Keep away from strong oxidising agents, strong acids and strong bases.

## 8 Exposure Controls and Personal Protection

### Exposure Standards:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

**Engineering Controls:** Ensure adequate ventilation of the working area.

### Respiratory Protection:

Respiratory protection is not usually required unless handling the product in bulk.

Use an approved vapour respirator under conditions where exposure to the substance is apparent (e.g. generation of high concentrations of mist or vapour, inadequate ventilation, development of respiratory tract irritation) and engineering controls are not feasible. See Australian Standards AS/NZS 1715 and 1716 for more information.

### Skin Protection:

PVC or rubber gloves. See Australian/New Zealand Standard AS/NZS 2161 for more information.

When selecting gloves for use against certain chemicals, the degradation resistance, permeation rate and permeation breakthrough time should be considered.

Occupational protective clothing (depending on conditions in which it has to be used, in particular as regards the period for which it is worn, which shall be determined on the basis of the seriousness of the risk, the frequency of exposure to the risk, the characteristics of the workstation of each worker and the performance of the protective clothing). See Australian/New Zealand Standard AS/NZS 4501 for more information.

### Eye and Face Protection:

Protective glasses or goggles for protection against splashing materials or liquids. See Australian/New Zealand Standard AS/NZS 1337 for more information.
