## DIRECTIONS FOR USE

**Important:** Prior to use read all directions on this label and on the label of the companion crop protection product. Any specific usage or restrictions on the crop protection product label have precedence over directions for use referred to on this label.

TITAN Paraffinic Spraying Oil is compatible with a wide range of herbicides including:

Fluroxypyr; Triclopyr; Haloxyfop; Clethodim; Tralkoxydim; Flumetsulam; Picloram/Triclopyr; Clodinafop; Quizalofop; Metosulam; Clopyralid; Picloram/2,4-D; Butoxydim; Fluazifop

TITAN Paraffinic Spraying Oil is compatible with the following insecticides:

Chlorpyrifos; Spinosad

TITAN Paraffinic Spraying Oil is compatible with the following defoliant products:

Ethephon; Thidiazuron

SITUATIONS	APPLICATION RATE / 100L
Broadacre cropping including fallow (except sugarcane)	Where specified use 500mL TITAN Paraffinic Spraying Oil / 100L, applying a minimum of 250mL of TITAN Paraffinic Spraying Oil per hectare.
Sugarcane	Where specified use 1L TITAN Paraffinic Spraying Oil / 100L water applying a minimum of 500mL TITAN Paraffinic Spraying Oil per hectare.
Spot and High Volume Spraying	Where specified use 500mL TITAN Paraffinic Spraying Oil / 100L water applying to point of run-off.
Horticulture	TITAN Paraffinic Spraying Oil is compatible with haloxyfop for horticultural uses. Use 500mL TITAN Paraffinic Spraying Oil / 100L water applying a minimum of 250mL TITAN Paraffinic Spraying Oil per hectare.

**NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

**WITHHOLDING PERIODS:** Adhere to the withholding period(s) specified on the label of the companion product(s) used.

## GENERAL INSTRUCTIONS

### CROP SAFETY

Refer to the directions on the agricultural chemical label. Caution must be exercised when applying TITAN Paraffinic Spraying Oil with agricultural chemicals on sensitive crops during periods when plants are subject to drought stress, high temperatures or high humidity. If in doubt about the appropriateness of using TITAN Paraffinic Spraying Oil, test by application to a small area before using it on a full scale basis.

### MIXING

- These are general mixing instructions. Follow the directions on the companion product label. Ensure product compatibility. Recommendations on other product labels always take precedence over mixing instructions on this label.
- Add water to the spray tank to 10cm above the level of agitation and ensure the agitation device is working vigorously. (There must be a minimum of 100L of water in the tank before any pesticide is added.)
- If tank mixing, use the following general order for the addition of mixing partners: water dispersible granules; flowable formulations; emulsifiable concentrates; water soluble liquids; and finally Titan Paraffinic Spraying Oil and other adjuvants.
- After the addition of each ingredient, allow at least one minute to ensure thorough mixing before the next tank-mix partner is added.
- Finally add Titan Paraffinic Spraying Oil, continue filling the tank to the required volume maintaining agitation at all times.
- Only mix sufficient spray solution for immediate use. Haloxyfop 520 and any other tank mixes should be applied immediately for best results.

### STORAGE OF SPRAY SOLUTION

Agitate for 1 hour every 8 hours, and agitate for 1 hour before spraying out where spray solution is not applied within 8 hours of mixing.

### CLEANING SPRAY EQUIPMENT

The presence of the product(s) makes it essential for the spray equipment to be thoroughly cleaned between different applications. To rinse and decontaminate spray equipment refer to the relevant product labels for instruction.

### PROTECTION OF LIVESTOCK, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemical or used container.

### STORAGE AND DISPOSAL

**EXPLOSIVE WARNING:** Apparently 'empty' containers contain liquid and/or vapour residue, which can be explosive if exposed to an ignition source at temperatures above 90°C. Such conditions may occur during cutting or welding.

DO NOT cut or weld these containers. Explosion may cause death.

Store in the tightly closed original container in a securely locked, well-ventilated place out of direct sunlight. DO NOT store near food, feedstuffs, fertiliser or seed. DO NOT re-use 5L and 20L containers. Triple rinse containers before disposal. Add rinsings to spray tank.

DO NOT dispose of undiluted chemicals on-site. If recycling replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers or product.

**For Refillable Containers:** Empty containers fully into application equipment. Close all valves and return to point of supply for refill or storage.

### SMALL SPILL MANAGEMENT

Wear appropriate clothing whilst cleaning up small spills. Apply absorbent material such as earth, cat litter, sand or clay granules to the spill. Sweep up material for disposal when absorption is complete. Dispose of contaminated material in accordance with state and/or local authority regulations.

### SAFETY DIRECTIONS

Will irritate eyes and may irritate skin. Avoid contact with the eyes and skin. When opening the container and preparing the spray wear elbow-length PVC gloves and face shield or goggles. If product in eyes, wash it out immediately with water. Wash hands after use. After each day's use wash gloves, face shield or goggles.

### FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126; New Zealand 0800 764 766. If swallowed, DO NOT induce vomiting, give a glass of water.

### SAFETY DATA SHEET

Additional information is listed in the safety data sheet (SDS). A safety data sheet for Titan Paraffinic Spraying Oil is available from TITAN AG Pty Ltd on request. Call Customer Service on (02) 9999 6655 or visit [www.titanag.com.au](http://www.titanag.com.au)
