

TITAN GRAIN PROTECTANTS

TITAN IGR GRAIN TREATMENT

300g/L S-Methoprene

For mixing with uninfested cereal grain for protection against immature stages of Lesser Grain Borer, Rust-red Flour Beetle and Saw-toothed Grain Beetle including organophosphate resistant strains.

AT A GLANCE

- Titan IGR Grain Treatment is a super concentrated 300 g/L S-Methoprene that will provide up to nine months protection of most cereal grains including barley, wheat, rice, oats, maize, sorghum
- Protects grain against juvenile stored product pests including lesser grain borer, rust red flour beetle, sawtoothed grain beetle (including those resistant to organophosphates), and stored grain insect pests including grain weevils.
- No withholding period.
- Registered for use on human and animal grains both for both local and export markets, check market MRL's.
- Compatible with a range of actives including spinosad, fenitrothion, chlorpyrifos-methyl and deltamethrin
- 100 mL product + 50 L water = 50 t of treated grain
- Do not move treated grain for 24 hours after treatment
- Available in 1L pack size
- Made in Australia

TRADE ADVICE

Export of Treated Produce Users should note that suitable MRL's or import tolerances may not have been established in all markets for produce treated with TITAN Grain Treatment IGR. Before treating grain for export, please check with TITAN AG for the latest information on MRL's and import tolerances.
