

TITAN PEACEKEEPER HORT 200SC

Chlorantraniliprole 200 g/L SC

Titan Peacekeeper Hort 200SC is an insecticide for use in select vegetable and strawberry crops, with translaminar activity to protect against Lepidopteran species insect pests.

KEY FEATURES

- ✓ Registered for use in a broad range of vegetable crops.
- ✓ Translaminar activity allowing for movement through the leaf for best control.
- ✓ Group 28 Insecticide (diamide) specifically designed to assist Integrated Pest Management (IPM) programs.

AT A GLANCE

CROPS:

Brassica vegetables, brassica leafy vegetables, stalk & stem vegetables, leafy vegetables, lettuce, fruiting vegetables, cucurbits, legume vegetables, potatoes, strawberries and sweet corn.

FORMULATION:

Suspension Concentrate (SC)

ACTIVE INGREDIENT:

Chlorantraniliprole 200 g/L

APPLICATION RATE:

100 to 150 mL/ha (crop & situation dependant) + non-ionic wetter

Such as Titan Wetter 600 Surfactant (check label for more information)

INSECTICIDE MOA GROUP: Group 28

INSECT SPECTRUM

CONTROL OF:

Cabbage-centre Grub (*Hellula hydralis*),
Cabbage Cluster Caterpillar (*Crocidolomia pavonana*),
Cabbage Leafminer (*Liriomyza brassicae*),
Cabbage White Butterfly (*Pieris rapae*),
Cluster Caterpillar (*Spodoptera litura*),
Cotton Bollworm (*Helicoverpa armigera*),
Diamondback Moth (*Plutella xylostella*),
Native Budworm (*Helicoverpa punctigera*),
Potato Moth (*Phthorimaea operculella*),
Soybean Looper (*Thysanoplusia orichalcea*),
Tomato Leaf Miner (*Phthorimaea operculella*),
Cucumber Moth (*Diaphania indica*)

CROP PROTECTION

SUCCESSFUL APPLICATION

RAINFASTNESS

Ensure application of Titan Peacekeeper Hort 200SC occurs at least 2 hours before expected rainfall to reduce risk of product being washed off prior to leaf absorption.

TARGET INSECT GROWTH STAGE

Crop scouting should be conducted regularly to ensure spraying periods are targeting eggs and newly hatched larvae before they become intrenched.

APPLICATION USE PATTERN

To minimise the risk of pest resistance, a maximum of three applications are to be applied to any one crop. No more than two consecutive applications are to be made per crop, with a minimum spray interval of 7 days.

COMPATIBILITY AND MIXING

If mixing Titan Peacekeeper Hort 200SC with other products, it is recommended to do a small pre-mix and observe any changes (separation, flocculation etc). This will help to avoid any in-tank mixing issues.

The recommended mixing sequence is as follows:

- » Fill spray tank with at least 70% of water volume
- » Water conditioners (e.g. AMS)
- » Water dispersible granules, dry flowable powders, wettable powders
- » Allow sufficient time for any granular products to completely disperse
- » Suspension concentrates – Titan Peacekeeper Hort 200SC
- » Emulsifiable concentrates
- » Water soluble concentrates
- » Oil based concentrates
- » Adjuvants and surfactants
- » Soluble fertilisers

Check with your local Elders agronomist for further information, especially when mixing multiple products. To gain local knowledge and experience.

INTEGRATED PEST MANAGEMENT

It's all too easy to miss the signs of increasing insecticide resistance, therefore do not rely exclusively on Titan Peacekeeper Hort 200SC for insect control. Use it as part of an integrated pest management (IPM) program involving insecticides with other modes of action and non-chemical methods of control.
