INTRODUCING

exilis[®] 5XL Plant Growth Regulator

Highly-effective formulation for exceptional post-bloom optimum thinning improving fruit size, quality and yield in apples.

The strengths of **exilis[®] 5XL**

- ✓ 5 x concentrated for more effective, safe secondary thinning for apples
- ✓ Quality performance in fruit sizing for some apple varieties
- ✓ New formulation delivers the same astounding thinning performance as **exilis[®]** while reducing the environmental impact
- ✓ Improved water solubility, easier to use patented formulation
- ✓ Successful management of biennial bearing and crop load

Key features of the new highly concentrated **exilis[®] 5XL**

- ✓ Easy to pour, easier to measure, easier to ship and easier to store
- ✓ Next generation formulation, same successful consistent results
- ✓ Less waste package material
- ✓ Optimum thinning achieved

From the same producers of  **corto[®]** and  **perlan[®]**
