TITAN IMAZAPIC 525 + IMAZAPYR 175 WG

HERBICIDE

525 g/kg Imazapic + 175 g/kg Imazapyr

TITAN Imazapic 525 + Imazapyr 175 WG Herbicide is a granule formulated herbicide for post-emergent control of certain annual grasses and broadleaf weeds in Clearfield **Production Systems for Canola and Wheat.**

KEY FEATURES

- ✓ Effective control of a wide range of weeds.
- ✓ Designed for use in Clearfield wheat and canola.
- ✓ Low rates in most situations, and easy to handle WG formulation.
- ✓ Wide range of application situations.

AT A GLANCE

CROPS: Canola & wheat varieties with

Clearfield technology

FORMULATION: Water dispersible granule (WG)

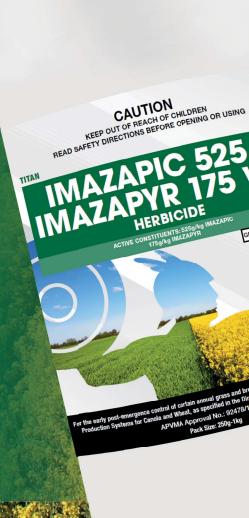

ACTIVE INGREDIENT: Imazapic 525 g/kg + Imazapyr 175 g/kg

HERBICIDE MOA GROUP: Group 2

WEED SPECTRUM

See product label for specific situations

For the control of a wide range of annual grasses and broadleaf weeds.

EXCLUSIVELY AVAILABLE FROM YOUR LOCAL Elder BRANCH

SUCCESSFUL APPLICATION

CROP VARIETIES

TITAN Imazapic 525 + Imazapyr 175 WG Herbicide should only be applied to certified canola and wheat varieties with Clearfield technology. Varieties with Clearfield Technology are those which have been bred specifically to be tolerant to TITAN Imazapic 525 + Imazapyr 175 WG Herbicide.

RAINFASTNESS

Ensure application of TITAN Imazapic 525 + Imazapyr 175 WG Herbicide occurs at least 2 hours before rain or dew and 48 hours before heavy rain. When mixing with other products, adhere to the rainfast requirements on the label.

PLANT STRESS

TITAN Imazapic 525 + Imazapyr 175 WG Herbicide should not be applied to crops which may be stressed due to prolonged periods of extreme cold, moisture stress (water-logging or drought) or previous herbicide treatment, as crop damage may result.

APPLICATION USE PATTERN

To minimise the risk of weed resistance, do not apply more than one application of TITAN Imazapic 525 + Imazapyr 175 WG Herbicide per season to any one crop.

USE OF SURFACTANTS

TITAN Duelling Spray Adjuvant is recommended for use with TITAN Imazapic 525 + Imazapyr 175 WG Herbicide in most spray scenarios to ensure effective herbicide uptake.

PLANTBACK PERIODS

- » TITAN Imazapic 525 + Imazapyr 175 WG Herbicide is broken down in the soil by microbes in wet, aerobic conditions.
- » Under conditions which do not favour breakdown, carry-over soil residues can affect susceptible follow crops.
- » Minimum re-cropping periods should always be observed and vary between states and application rates.
- For all plant back periods please refer to the TITAN Imazapic 525 + Imazapyr 175 WG Herbicide product label.

MIXING GUIDE

TITAN Imazapic 525 + Imazapyr 175 WG Herbicide should be added to the spray tank with simultaneous agitation. If ability to agitate the spray tank is limited, premix the TITAN Imazapic 525 + Imazapyr 175 WG Herbicide in a bucket before adding to the main tank. TITAN Imazapic 525 + Imazapyr 175 WG Herbicide must always be kept in suspension in the tank by continuous agitation.

The recommended mixing sequence is as follows:

- 1. Half fill the spray tank, maintaining agitation
- 2. Add TITAN Imazapic 525 + Imazapyr 175 WG Herbicide (as decribed above).
- 3. Add water to fill the spray tank to 70%.
- **4.** Add water dispersible granules.
- **5.** Add emulsifiable concentrates.
- 6. Add the surfactant.
- 7. Add water to bring to the final spray volume.

COMPATIBILITY

TITAN Imazapic 525 + Imazapyr 175 WG Herbicide is compatible with TITAN Clopyralid 750SG Herbicide and TITAN LVE MCPA 570 Herbicide. Application should be a minimum of three or six hours respectively, before rainfall or overhead irrigation.

INTEGRATED WEED MANAGEMENT

It is easy to miss the signs of increasing weed resistance, therefore do not rely exclusively on TITAN Imazapic 525 + Imazapyr 175 WG Herbicide for weed control. Use it as part of an integrated weed management program involving herbicides with other modes of action and non-chemical methods of control.
