## DIRECTIONS FOR USE

TITAN Vepo Moisture Retainer use rates can be determined by soil type along with tyne spacing. Lighter soils, specifically light sands require the higher use rate while soils with a higher gravel content can show good responses at lower rates.

TYNE SPACING WITH SINGLE ROW DELIVERY	LIGHT SOILS RATE L/ha	GRAVEL SOILS RATE L/ha	CRITICAL COMMENTS
25cm (10 inch)	3-4.5	2-3	Apply by continuous liquid stream as close to the seed as possible using a minimum of 50L/ha of water and/or liquid UAN.
30cm (12 inch)	2.75-3.75	1.5-2	
38cm (15 inch)	2-3	1-1.5	Typically, higher carrier volumes achieve greater crop response.

## MIXING GUIDE

TITAN Vepo Moisture Retainer is a moderately viscous moisture retention product and pumping issues may occur in cold conditions. If necessary, dilute TITAN Vepo Moisture Retainer with water at a minimum ratio of 1:1. Always add TITAN Vepo Moisture Retainer to water if diluting.

1. Half fill liquid cart/mixing tank with water and/or UAN whilst maintaining agitation.
2. Slowly add the required volume of TITAN Vepo Moisture Retainer or pre-diluted mixture and continue agitation – allow time to disperse.
3. Continue agitation and top-up with remaining water and/or UAN.
